

1-Line, Bi-directional, Transient Voltage Suppressors

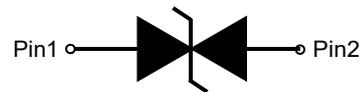

Descriptions

The ESD15D100TA is a bi-directional TVS (Transient Voltage Suppressor). It is specifically designed to protect sensitive electronic components that may be subjected to ESD (Electrostatic Discharge), EFT (Electrical Fast Transients) and Lightning. It is particularly well-suited for cellular phones, portable device, digital cameras, power supplies and many other portable applications because of its small package and low weight.

The ESD15D100TA may be used to provide ESD protection up to $\pm 30\text{KV}$ Air, $\pm 30\text{KV}$ contact compliance to IEC61000 -4-2 , and withstand peak pulse current up to $6\text{A}(8/20\mu\text{s})$ according to IEC61000-4-5.
